CORE ADMIN

Assigning MPCS and Milk PCS to ACI / PA

CI Guide
Department of Cooperation, Sikkim
Government of Sikkim

1. **Register** — Add your MPCS / Milk unit
2. **Wait** — ACI / PA register themselves
3. **Assign** — Users & Roles in CORE ADMIN
4. **Check** — Officer sees it in the app

Who can use what

Role	Field app	CORE ADMIN
CI	**Yes**	**Yes — review reports, assign ACI / PA**
ACI / PA	**Yes — only institutions assigned to them**	**No**

1 Register your institution (field app)

1. Open **core-cooperationdptt-gos.vercel.app** and sign in.
2. Open **My Institutions** and tap **Add**.
3. Choose **MPCS Society** or **Milk PCS Unit**, enter name, registration number and address, then save.
4. It now appears in your list and is yours to assign.

2 ACI / PA register themselves

- Each ACI and PA registers in the field app (**Register here**). They appear in your **Users & Roles** list straight away. No Admin approval is needed and you do not create accounts.
- Until you assign them an institution, they can sign in but see nothing.

3 Assign an institution (CORE ADMIN)

admin-ten-rho-87.vercel.app

1. Sign in with your CI email and password.
2. Open **Users & Roles**.
3. Tap **Assign ACI to Unit** or **Assign PA to Unit**.
4. Pick the **MPCS / Milk unit**, then the **officer**, and confirm.

Shortcut: in the officer's row tap ⋮ → **Assign institution**. On a phone, use **Assign another institution** on the officer's card.

Change or remove

- **Reassign Unit** — hand the institution to a different ACI / PA.
- **Revoke** — remove their access straight away. You can assign again later.
- **View Governance Tree** — see who has which institution.

> **Check it worked:** ask the ACI / PA to open **View My Institutions**. It should be listed. If not, ask them to sign out and in.

Who sees whom

- **You (CI):** yourself, your own ACI / PA, and every ACI / PA no CI has taken yet. Never another CI.
- **Once a CI assigns** an ACI / PA, they disappear from every other CI's list.
- **If all their institutions are revoked**, they return to the shared pool.
- **System Admin:** sees everyone and which CI assigned which ACI / PA.
